

Y4 Multiplication Check

At Elsenham, we value the importance of learning times tables to support children's mathematical understanding. The ability to recall multiplication and division facts at speed, enables children to answer related questions in the curriculum with ease.

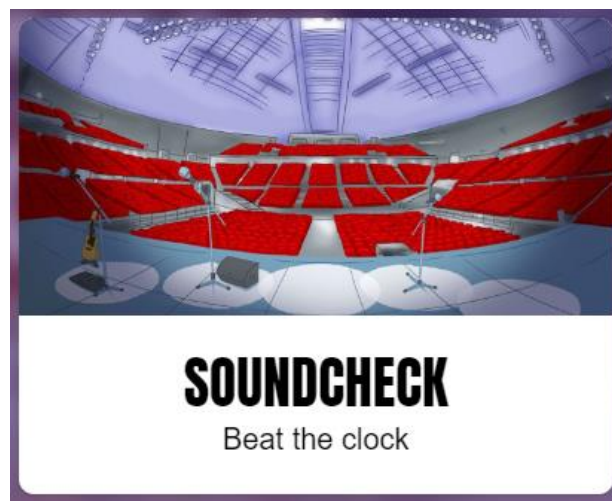

According to the new National Curriculum 2014 the expectation of times tables in each Year Group is as follows:

Year 2: 2x, 5x, 10x

Year 3: 3x, 4x, 8x

Year 4: 6x, 7x, 9x, 11x, 12x

All Year 4 children will complete the multiplication tables check, commonly referred to as the MTC in June each year. The children will be asked to complete twenty-five questions online and will have six seconds to answer each calculation. This time includes typing and entering the answer so quick and accurate keyboard skills are essential.

As part of our subscription to Times Tables Rock Stars, your child can practise for the MTC in the soundcheck area.
